## DETAILED ACTION

### *Restriction / Election*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1 to 19, drawn to an article comprising a thermoplastic composition, classified in class 524, subclass 450.
  - II. Claims 20 to 22, drawn to a process for making an article comprising a thermoplastic composition, classified in class 524, subclass 450.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions Group II and Group I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, Group I invention can be prepared by polymerization process catalyzed by metallocene catalysts.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Karen A. LeCuyer (Registration No. 51,928) on May 16, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
